- IT service & Innovation Team
- Executive & Senior Management

Register Now

In this seminar, we shall focus on Smart Automotive Logistic & Real Estate IoT and Big Data solution. You will learn how to leverage Alibaba Cloud to build cloud infrastructure to gather, process, analyze, and act on data generated by connected devices, without maintaining a separate infrastructure to transform the business efficiency & bring insights for the managements. We shall showcase :

- Logistic solution integrate with Alibaba Cloud Quick BI report
- Smart environment monitoring by ecMonitor Monitoring Application with LoRa and NB-IOT devices
